

Infrastructure Development Manifesto – Rebuilding the Foundation of Opportunity

Vision:

A connected, functional and equitable Muthwani Ward where every road, school, clinic, market and playground serves as a gateway to dignity and opportunity.

Mission:

To deliver an inclusive, modern and sustainable infrastructure transformation in Muthwani Ward through public participation, smart partnerships, and result-driven leadership.

Infrastructure is not just about roads and buildings. It is the architecture of dignity. It is the pipeline of progress. And in Muthwani Ward, it is broken — but not beyond repair. This agenda is bold, people-driven, and built to last.

1. Road Network Transformation – Connecting Every Corner of Muthwani

Our first priority is to connect all three sub-locations of Muthwani Ward — **Muthwani, Katani, and Ngelani** — with a functional and resilient road network. This includes centres and estates like **Joska, Githunguri, Eka Tano, Kamulu (Machakos side), Nduvoini, and Utawala-Airways**. The new plan will: - Establish a full ward-wide road network audit. - Push for tarmacking of all major access roads linking centres, sub-locations and markets. - Improve estate and village feeder roads with proper murram grading and drainage. - Use public forums to prioritize the most critical local roads (e.g., school routes, health centres, market access).

2. Market Centres as Engines of Growth

Every centre — from **Joska, Katani and Eka Tano to Githunguri and Nduvoini** — will be supported to grow through strategic zoning and physical upgrades: - Rehabilitate access roads and feeder networks to markets. - Install sanitation blocks, clean water points, and solar lighting. - Decongest and organize trading zones through phased infrastructure planning.

3. Education, Health, and Recreational Infrastructure

We will prioritize upgrading public ECDEs, primary schools, secondary schools and health centres across the ward. Our plan includes: - Classrooms, sanitation, boundary walls and learning amenities. - School playgrounds developed through **CSR partnerships with companies and NGOs**. - Equipping dispensaries and pushing for a full public health centre in every sub-location. - Safe access roads and fire exits around schools, playgrounds and clinics.

4. Digital Infrastructure – Civic Engagement and Access Hubs

Each main centre will have a **Digital Access & Communication Centre** offering: - Free internet, bursary forms, eCitizen and Huduma services. - Public notice boards for development alerts, jobs, and civic education. - Feedback desks to strengthen public accountability.

5. Lighting, Drainage and Safe Public Spaces

Insecurity, flooding and sanitation neglect will be addressed through: - High-mast floodlights and solar streetlights in estates and markets. - Proper drainage in roads, open spaces and near public amenities. - Partnership with youth groups for cleaning and maintenance work.

6. Utilities and Housing Infrastructure

Working with the **Machakos County Government**, national agencies and private partners, we will: - Extend piped water networks and upgrade boreholes. - Advocate for affordable housing near Joska and Katani. - Improve planning enforcement and fire emergency access roads.

7. Leveraging Partnerships for Lasting Impact

This plan integrates: - The **Machakos County Integrated Development Plan (CIDP)** priorities. - **Public-private partnerships** with quarry operators and infrastructure contractors. - Collaborations with **NGOs, CSR initiatives and global best practice** to deliver cost-effective, people-first solutions. - Infrastructure mapping using **data and community-led identification** of high-priority projects.

This plan is not abstract. It meets you where you are: - The broken footpath to your home. - The dark corner outside your local church. - The classroom needing a roof. - The road that turns into a river when it rains.

We are building a new Muthwani — not with empty promises, but with clarity, commitment, and community collaboration.
